STAY LUXE

HYALURONATE + LIDOCAINE

STYLUX® DEEP, LIP, FINE, are a sterile, transparent, non-pyrogenic, viscoelastic, cross-linked hyaluronate gel for Intra dermal injection from non-animal origin. STYLUX® REDENSITY is a sterile, transparent, non-pyrogenic, viscoelastic hyaluronate gel for Intra dermal injection from non-animal origin.

DEEP

STYLUX DEEP® is specially formulated to treatment of the deep wrinkles on the face such as forehead, nasolabial folds, vertical lip lines and creases. Also STYLUX DEEP® indicated for skin hydration and cheek augmentation and restores the shape of the face.

FINE

STYLUX FINE® is specially formulated to treatment of the superficial wrinkles on the face (peri-auricular, peri-buccal, frontal, perioral areas). Also STYLUX FINE® indicated for correction of cervical and neck wrinkles. STYLUX FINE® restores small amount of soft tissue.

LIP

STYLUX LIP® is specially formulated to treatment of the superficial wrinkles on the face (peri-auricular, peri-buccal, frontal, perioral areas). Also STYLUX LIP® indicated for correction of cervical and neck wrinkles. STYLUX LIP® restores small amount of soft tissue.

REDENSITY

STYLUX REDENSITY® is specially formulated to modification of aged skin, volume restoration and filling of skin depression and fine wrinkles. STYLUX REDENSITY® is also indicated for skin hydration and to treat the under eye circles, including tear trough.

Cross-Linked Technology:

Stylux® utilizes a proprietary cross-linking process known as cross-linked Technology, which employs 1,4-Butanediol Diglycidyl Ether (BDDE) to create stable covalent bonds between hyaluronic acid (HA) chains. This results in a three-dimensional polymeric network with enhanced resistance to enzymatic degradation and mechanical breakdown.

By fine-tuning parameters such as degree of cross-linking, HA concentration and molecular weight distribution, cross-linked technology allows precise control over rheological properties; specifically G' (elastic modulus), cohesivity and viscosity. This ensures each Stylux® formulation delivers targeted clinical performance:

High G' and cohesiveness for structural support in deep planes (Stylux®Deep)

Moderate viscosity and elasticity for dynamic regions such as the lips (Stylux®Lips)

Low viscosity with high spread ability for superficial applications and bio revitalization (Stylux® Fine & Redensity)

The result is a line of dermal fillers with excellent tissue integration, minimal inflammatory response and prolonged residence time, typically ranging from 6 to 12 months depending on product and indication.

Stylux® is the next generation of advanced dermal fillers, designed for safe, effective and natural-looking results. Made with non-animal origin hyaluronic acid and developed using cutting-edge cross-linking technology, Stylux® reflects the future of aesthetic innovation. Manufactured under the highest European quality standards, Stylux® fillers restore volume, smooth wrinkles and revitalize skin with precision and elegance.

Thanks to its hypoallergenic formula and skin-friendly properties, Stylux® is suitable for all skin types, ensuring patient comfort and confidence at every stage. Every aspect of its formulation has been engineered to maximize patient satisfaction and aesthetic outcomes.

Key Advantages:

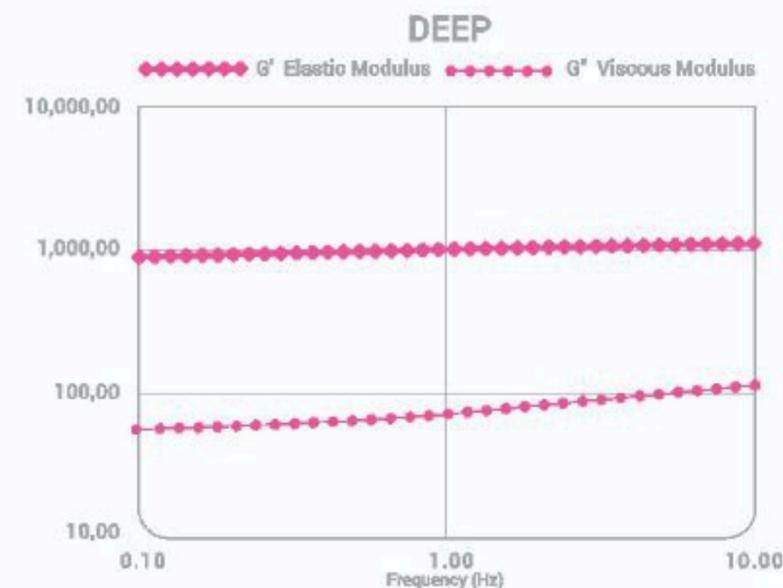

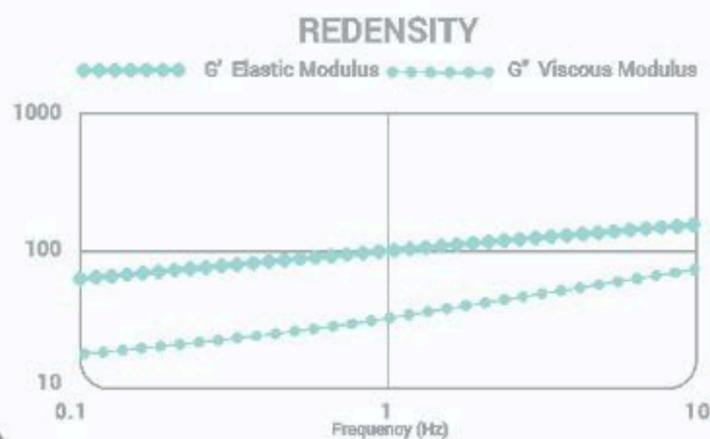

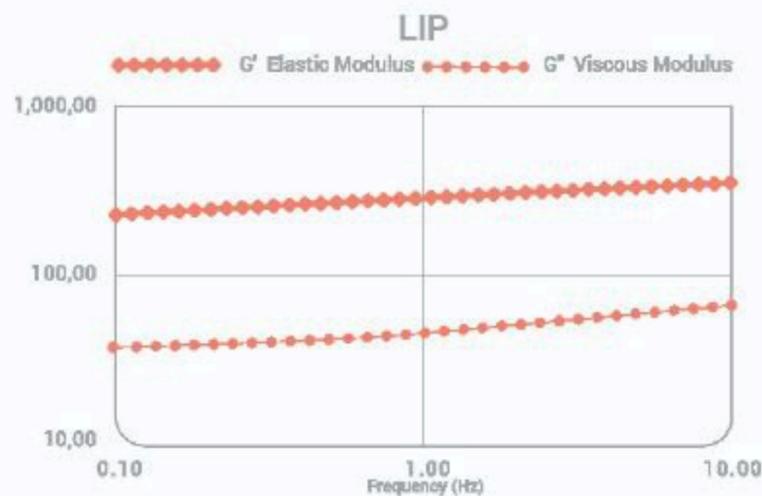

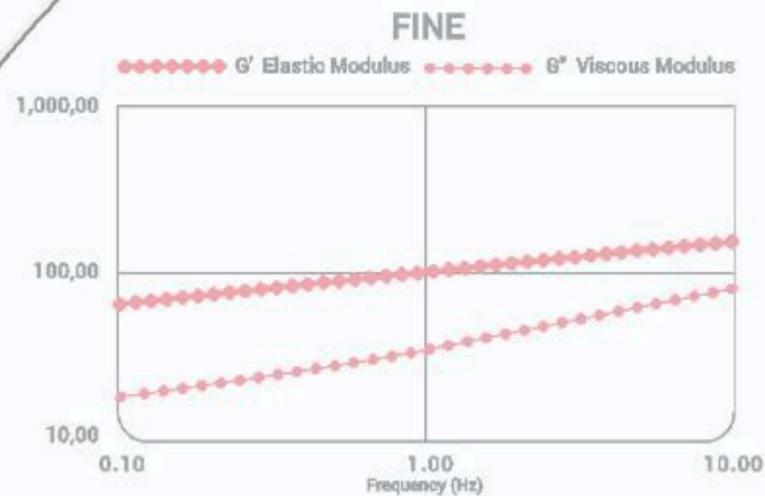

- Advanced cross-linked Technology for long-lasting stability and integration
- High HA concentration with lidocaine for a smooth, comfortable experience
- Minimal swelling, bruising and downtime
- Designed for natural-looking, undetectable enhancements
- Suitable for sensitive skin and hypoallergenic
- Backed by clinical trials in Tehran University
- Comprehensive post-treatment support and care guidelines

 **STYLUX®**

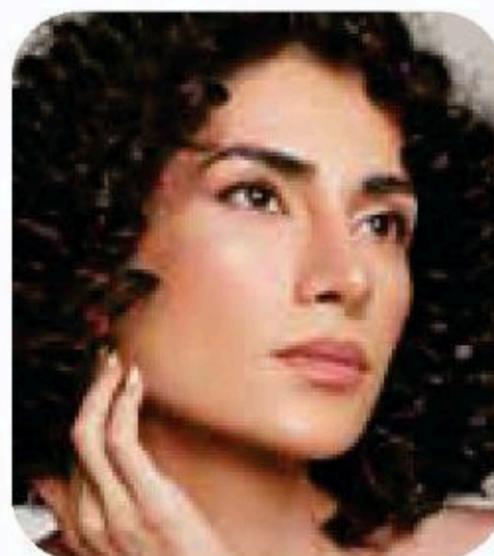

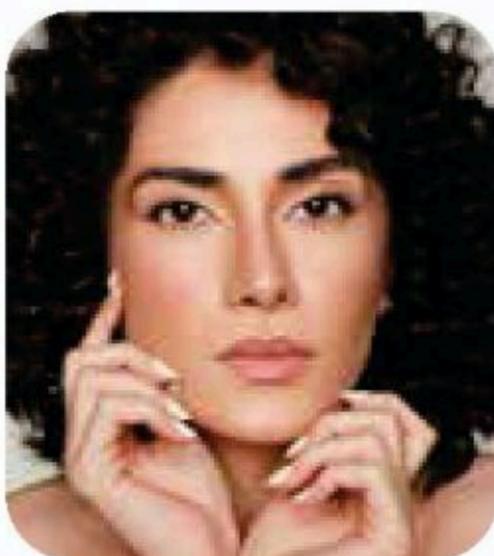

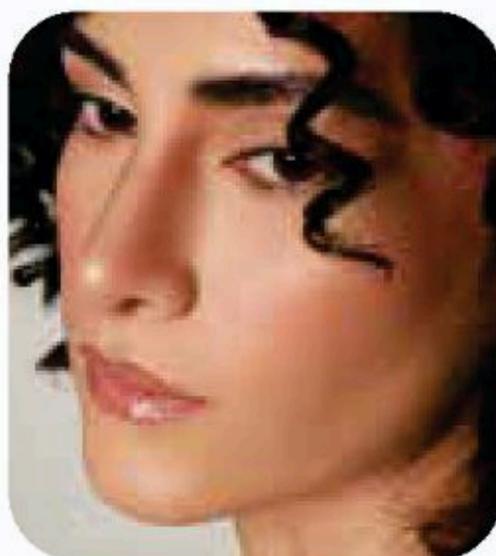

Rheological Excellence – Engineered for Precision

The rheological profile of each Stylux[®] filler is meticulously designed to meet the specific functional demands of various facial indications. Parameters such as elasticity (G'), viscosity and cohesiveness have been optimized to ensure smooth injection, superior tissue integration and long-lasting aesthetic results. Our advanced cross-linking technology balances firmness and flexibility, allowing for:

- High G' and lifting capacity in Stylux[®] Deep for structural support
 - Medium elasticity and spread ability in Stylux[®] Lips for natural contours
 - Low viscosity and fine diffusion in Stylux[®] Fine for superficial lines
 - Hydration and smooth flow in Stylux[®] Redensity for revitalization treatments
- These rheological graphs demonstrate the scientific foundation behind Stylux[®]'s performance, helping practitioners select the right product with confidence and precision.

STERILE, INTRADERMAL GEL FOR INJECTION ◊ HYALURONATE + LIDOCAINE

STYLUX®

STYLUX® DEEP

1mL cross-linked high molecular weight hyaluronate 23mg/mL Lidocaine HCl 3mg/mL
Restoring Volume, Defining Contours

Stylux® Deep provides structural support for deep-set wrinkles and areas of volume loss. With its high G' and strong cohesiveness, it is the perfect choice for sculpting and reshaping facial contours.

Key Features:

- High-viscosity HA for firm projection
- Corrects nasolabial folds and marionette lines
- Ideal for jawline, chin and cheekbone enhancement **Duration:** 9–12 months

STERILE, INTRADERMAL GEL FOR INJECTION ◊ HYALURONATE + LIDOCAINE

 STYLUX®

STYLUX® REDENSITY

1mL high molecular weight hyaluronate 18mg/mL Lidocaine HCl 3mg/mL
Glow from Within

Stylux® Redensity revitalizes the skin with a powerful combination of non-crosslinked HA and essential nutrients. It is designed for deep hydration, improved elasticity and skin regeneration.

Key Features:

- Enriched formula for skin bio revitalization
- Improves tone, texture and elasticity
- Recommended for the face, neck and hands

 STYLUX®

STERILE, INTRADERMAL GEL FOR INJECTION ◊ HYALURONATE + LIDOCAINE

STYLUX® FINE

1ML cross-linked high molecular weight hyaluronate 20mg/mL Lidocaine HCl 3mg/mL

Smooth Touch for Subtle Lines

Stylux® Fine is expertly formulated for the treatment of superficial wrinkles and delicate skin areas. With its low viscosity and soft texture, it diffuses gently into the tissue, providing hydration and a natural glow without altering facial expression.

Key Features:

- Gentle correction of crow's feet and perioral lines
- Boosts hydration and improves overall skin quality
- Ideal for first-time patients and preventive treatments **Duration:** 6–9 months

STYLUX®

معرفی فیلرهای استایلوکس

استایلوکس با فرمولاسیون پیشرفته بر پایه هیالورونیک اسید و لیدوکائین، برای پاسخ به نیازهای متنوع زیبایی و بازیابی جوانی و طراوت پوست طراحی شده است. هر محصول با ویژگی و غلظت خاص خود، برای ناحیه و هدف مشخصی به کار می‌رود.

STYLUX®

®STYLUX
LIP

حجم‌دهی طبیعی به لب‌ها

- افزایش حجم و اصلاح عدم تقارن لب‌ها
- غلظت مناسب و انعطاف‌پذیر برای حفظ حرکت طبیعی
- آبرسانی عمقی برای ظاهری جوان‌تر و لطیف‌تر
- بازیابی جوانی پوست و چهره با تزریق در ناحیه اطراف شقیقه

● ماندگاری: ۹ - ۱۲ ماه

STYLUX®

®STYLUX
FINE

ظرافت در اصلاح خطوط سطحی

- مناسب برای خطوط پنجه کلاغی و اطراف لب
- غلظت مناسب و ویسکوزیته پایین برای پخش یکنواخت در بافت
- افزایش رطوبت و درخشندگی پوست بدون تغییر حالت چهره
- ماندگاری: ۶ - ۹ ماه

STYLUX®

®STYLUX
DEEP

فرم‌دهی و بازگرداندن حجم از دست‌رفته

- مناسب برای خطوط عمیق، افتادگی و کاهش حجم
- انتخاب ایده‌آل برای زاویه‌سازی فک، فرم‌دهی چانه و برجسته‌کردن گونه‌ها
- ویسکوزیته بالا برای ایجاد استحکام و پایداری فرم
- ماندگاری: ۹ - ۱۲ ماه

STYLUX®

استایلوکس، فیلری بر پایه هیالورونیک اسید خالص و استاندارد

فرمولاسیون استایلوکس با استفاده از هیالورونیک اسید باکیفیت، برای رسیدن به نتایج طبیعی، ماندگار و ایمن طراحی شده.

برای تمام پزشکانی که به دنبال انتخابی علمی، تخصصی و به روز هستند، استایلوکس یک همراه قابل اعتماد.

اول از همه،
هیالورونیک اسید چیست؟

هیالورونیک اسید ماده‌ای است که به طور طبیعی در بسیاری از ارگان‌های بدن از جمله پوست، مفاصل و چشم‌های ما وجود دارد.

وظیفه‌ش چیه؟

جذب و حفظ رطوبت به اندازه‌ی چند برابر وزن خودش!

یعنی وجود این ماده باعث می‌شه پوست نرم، مرطوب و انعطاف‌پذیر بمونه.

چرا هیالورونیک اسید در فیلرها پرکاربرده؟

- زیست سازگار و ایمن
- قابل جذب توسط بدن
- قابلیت فرم دهی بالا
- اثرات طبیعی و قابل کنترل

تمام این ویژگی‌ها باعث می‌شوند فیلرهای بر پایه هیالورونیک اسید، انتخاب اول بسیاری از پزشکان برای تزریق لب، خط خنده، زیر چشم و... باشند.
